## Elektroakupuncture

### Devices for the Elektroakupuncture acc. to Voll (EAV)

Most Kindling devices in our current inventory can be combined with each other [Model Combinations] and can be connected with all Kindling software programs.

**World regulators have found that the point probe devices are controlled by the therapist's speed of delivery of the probe to the skin, thus the therapist controls the response and they fail all double blind testing, the world regulators have found these devices to all be fraudulent to use**

### DIAGNOSTICS

#### Akuport M1

The compact starter device for the modern bioelectrical assessment procedures of EAV.

#### Akuport M1+

The ideal starting device for the modern bioelectrical assessment procedures of EAV; expandable in a modular system with the Akuport MT and/or MR2.

#### Akuport M2

This portable diagnostic device with integrated measurement of electrical current in the mouth, large display instrument and digital display is ideal for the practice and for portable use.
