

Resonant Field Imaging™

WHPRS Rating = 1

Some shaky science, no registration of claims, no studies, no validation

After years of research into the mechanics of bioenergy, ITEM successfully developed what we believe is the first **objective** bioenergy measurement and analysis system in the world - **Resonant Field Imaging™ (RFI™)**. Using this experimental process, you can easily monitor the auras of humans, animals, and even plants, as well as evaluate the energy fields of non-living objects, at 50% - 90% less than other "aura imaging" devices on the market. Doctors, chiropractors, psychologists, alternative therapists, and hobbyists all over the world are joining in this revolution to form an international network of **RFI™** users. **RFI™** is currently being used in 57 countries around the world.

With **RFI™** Version 3.1 Software, you can use standard templates to show the human bioenergy field, or you can create your own template by importing a picture:
