

The CoRe-System compared

WHPRS Rating = -1

No science, no research, no validation, just dribble drool lies about other companies

Lies about other people from a deluded mind

CoRe compared with QXCI /SCIO and L.I.F.E.- System these are all lies

The QXCI developed by Bill Nelson is basically a Radionic System however much Bill wants to hide this behind a lot of New Age wording. The QXCI can be used with or without the box and harness attached, this means that it not really measuring what it calls Trivector or anything else. In fact opening the box everyone quickly can see that it contains only an random number of electric parts, only the LED on the front do work.

One is being warned not to repeat a measurement (called Xrroid) more often than every 48 hours because according to the manufacturer this would put too much stress on the body..... in fact however it would expose that no two analysis results are even remotely similar. (In case you ask about it, you are told that the body as an energetic entity is in constant change)

The L.I.F.E. is a almost perfect clone of the QXCI put together by former distributors of QXCI (see [this post](#) for more details). The SCIO is a QXCI with a few new screens and a little bit more Disney like animation.

With the CoRe-System you can do all that you can do with the QXCI, without much of the chaotic graphics and worthless movies, however with the real benefit that the CoRe incorporates a knowledge base of thousands of remedies which allows the user

to narrow down the radionic search to well known conditions and remedy groups. Also the CoRe with more than 20 thousand remedies has more than twice the number of items than the QXCI. Most importantly the CoRe has an alternate Evaluation mode which gives a far superior reproducibility of results.

CoRe compared with regular Radionic systems like the Quantec and Powerradionics

Quantec uses a Diode which creates electric noise (called white noise), which in fact is an unpredictable oscillator. Quantec holds that this is a superior Random Number Generator, because it is identical to that used in the PEAR Laboratory. However the PEAR Experiments has no resemblance to radionic remedy finding and can neither prove or disprove the superiority of such a Diode in Radionics. For more details see my Correspondence with [PEAR](#) as well as my postings on [Randomness](#) and [Pseudo Random](#). Apart from that Quantec is a regular Radionic system of the old style. Power radionics is using the old Rubbing Plate with Dials configuration, with the possibility of attaching a computer to work with pictures of the target. To see the Advantages of the CoRe-System over these older style systems click [here](#).

CoRe compared to Bioresonance (like Bicom / Mora) and EAV /EDS (like Avatar, Dermatron...)

Most Bioresonance and EAV systems comprise today a database of virtual remedies for testing and treating, in this respect they are similar to the CoRe. However different from the CoRe they use a point probe for "measuring" and claim this is a physical process. In fact the readings change so much with almost imperceptible differences in the speed of application of the point probe that those instruments are actually sophisticated Pendulum.... see the article about [Reproducibility](#) for more details.

CoRe compared to Rife, Zapper, Scenar, Magnetic Pulse and others

All those are sophisticated means to work with the energetic system of the body, and can be very useful if applied correctly. The CoRe in comparison works primarily on the Informational level and thus is very much complimentary to these modalities. For the difference of Energetic and Informational levels take the [Tour](#). Also none of these can be a diagnostic aid to the degree the CoRe can with its more than 20 thousand remedies and elaborate evaluation modes.
